

If I (the consumer) pay for a service, then I (the consumer) should have the right to determine what services I want to pay for. An outside agency does not have the right or authority to make that decision for me. Satellite radio is a service that should be geared to pleasing me the consumer and not some faceless agency. I do not support the petition 04-160 for the sole reason that it should be up to me, the consumer, what I want to hear. I subscribe to satellite radio for the sole reason of the variety of channels offered. This includes traffic and weather. I urge you to reject petition 04-160. Thanks.
